RE: Stansbury Island Quarry Mine Plan Modification

Dear Ms. Bolinder:

The Bureau of Land Management's (BLM) Salt Lake Field Office received the proposed modification to your Plan of Operations (Plan) serialized U-77020 on March 16, 2010.

The BLM Salt Lake Field Office has completed the review of your mine plan modification for the Stansbury Island Quarry and determined the document is technically adequate and a bond adequacy determination has been made and it concluded that the amount of your bond is adequate to cover your proposed operation at this time.

Mining activities will consist solely on what is contained in the approved Plan and Plan modification. Any additional mining activities on public lands would need to be approved prior to their occurrence.

This does not constitute: certification of ownership to any persons or company named in your plan of operations; recognition of the validity of any mining claims named in your plan of operations; or recognition of the economic feasibility of the operations proposed.

At this time the BLM approves the modification to Plan U-77020, as long as you have concurrence from the Utah Division of Oil, Gas & Mining and any other State or local agencies necessary to conduct the mining operations contained within your Plan.

If you have any questions, or require additional information, please contact Larry Garahana of my staff at (801) 977-4371.

Sincerely,

Michael G. Nelson  
Assistant Field Office Manager  
Non-Renewable Resources
